# NEW 8855 - 2021

The brand new AT-FH seat is the first ever product approved under FIA 8855-2021 standard.

This high-strength racing seat model is raising the quality bar when compared to the old generation of FIA 8855 seats. Furthermore, the new 8855-2021 standard by FIA allows the seat to be comparable in performance to the higher standard 8862-2009 seats, but at a fraction of their pricing.

FIA 8855-2021 seats are quasi-static tested as per FIA's prescription, by replicating a 42G accident situation, together with the consequent stresses deployed on the product.

As of today, Atech Racing has approved six seats according to the new FIA 8855-2021 standard, covering all the driver sizes.
